Below are the SDZG Library's lists of subject, taxonomic, and geographic search terms. Only the terms in UPPERCASE are used to index SDZG Library holdings. If you run a subject search in our catalog and don’t find the expected results, please check this list for the terms in uppercase that most closely match what you are looking for. Please note: bracketed [ ] headings are used to group related terms, and are typically not used as subject terms themselves.

**SUBJECT THESAURUS**

### TAXONOMIC THESAURUS

Classes and Orders are in bold caps. Families and Genera are listed hierarchically beneath. In some cases a family consists of a single species or genera and a redundant taxonomic term has not been added. Note: class terms MAMMALS, BIRDS, AMPHIBIANS, and REPTILES are typically reserved for major works only.
